\$2.00 A YEAR IN ADVANCE

LORD LINLITHGOW MIGHT BE NEW GOVERNOR-GENERAL

With the departure of Lord Willingdon now a matter of two or three months away, political speculators are busy with conjectures as to the identity of his successor as Governor-General of Canada. It is learned from reliable sources that the Government has no one definitely in view but it can be said positively that the next occupant of the vice-regal office will not be a native Canadian. The preponderance of opinion in the Dominion appears to be against Canada following the example of Ireland and Australia.

The name of the Marquis of Linlithgow is now mentioned in connection with the post. He is a prominent Scottish peer in his 40's and while he has not been particularly active politically he has done some speaking in the Old Country. He was formerly known as Lord Hopetown and is tall, good-looking, democratic and has a good deal of money. Politically he is described as a liberal-minded Tory. He has been active in Scotland in the solution of agricultural problems. Whether the marquis has had sufficient experience to equip him for the Governor-Generalship of Canada is a question.

FISH SHIPMENTS HEAVY

A heavier movement of frozen fish has been noticeable this year over the lines of the Canadian National Railways and increased demands have brought the first shipment of whitefish from Saskatchewan two weeks earlier than in other years. The initial car passed through Winnipeg last week en route to Toronto from Big River.

The Manitoba fish season has produced 217 cars to date, shipped from Winnipegosis and neighboring points. These figures are a satisfactory increase over 1929. There has been no western movement of Manitoba fish but cars have been shipped to Saint John, New York, Philadelphia and as far south as Louisville, Ky. as well as to many points in Ontario, Quebec and the Maritimes. Shipments are decided on the upgrade and during the first three weeks in December 109 cars were reported.

BRIDGE PLAYERS ARE FUNNY

Even to play at home they must have a pack containing four suits.

They are always willing to score over their best friends.

The liveliest player can be the dummy.

They lose their hearts with the opposite effect to falling in love.

They may have clubs in their hands without making a hit, and sit away from the door and yet make a grand slam.

They may be quite chivalrous and yet will throw away a queen; cautious, yet pin their hopes on a knave.

They hold hands even though they are not playing for love.

The straightest player makes his gains by trick-ery.

A rubber does not wipe out the old scores.

They often play for a stake and then eat a sandwich.

Even the best player knows that success depends on a good deal.

They may be teetotalers, but they never miss the chance of a double.

G. F. ABBOTT

Hockey Notes

ROCKYFORD WINS FROM CARBON

The first hockey game of the season for the Carbon boys was played at Rockyford on Christmas Day, and the Rockyford team won by a score of 4-1. The game was close all the way thru and both teams played well considering that they have had no practice at all so far this year. In the first period there was no score. In the second period the Rockyford boys scored one; in the third period Carbon scored one goal and Rockyford netted another. The last period was fast and furious and the Rockyford boys succeeded in getting two more goals in the last few minutes of play, making the score 4-1.

The following is the line-up of the Carbon team: Goal, A. Turcotte; Defence, Leo Halstead, Hugh MacDonald and Alex Poxon. Forwards, W. Poxon, Jack Spence, E. Rouleau, C. Oliphant, G. Ramsay, Bruce Ramsay.

It is expected that a return game will be played at Carbon in the near future.

Ghost Pine to Play Here

Arrangements have been made with the Ghost Pine Hockey team to play at Carbon on Saturday evening, January 3rd, at 7 p.m. It is to be hoped that a good crowd of rooters will be on hand for the game ought to be exciting, the Ghost Pine boys having a pretty fair team this year. Don't forget to be at the rink on Saturday sharp at 7:00 p.m. for this hockey game.

Rockyford and Carbon High Schools Played at Carbon Saturday

The Rockyford High School Hockey team visited Carbon on Saturday afternoon of last week and played with the Carbon High School. Rockyford players proved too strong for the Carbon boys and won with a score of 6-1. This was the first game of the season for both teams and before the season is out it is anticipated that many more will follow.

MARRIAGE

At the Manse, Carbon, Alberta, on Wednesday, Dec. 24th, 1930, by Rev. Wm. McNichol, M. A., Mr. Eric A. Robinson and Miss Evelyn M. V. Evans, both of Carbon.

FOR SALE—Upland Hay, \$11 per ton f.o.b. Phone 1311, E. B. DeWitt Crossfield.

CARD OF THANKS

Mrs. MacDonald and family wish to express their sincere gratitude and appreciation to all those who by their kindness, help and expression of sympathy assisted in any way during our recent very sad bereavement.

The recent visit of the Canadian trade delegation to the Orient was an immeasurable stimulant to trade relations with Canada and should increase materially the imports and exports of China and Japan, according to C. I. Barr, General Agent of the Canadian National Railways at Shanghai, China, who was in Western Canada last week on his way to Montreal where he will spend part of his four months leave.

"SATURDAY NIGHT KID" TO SHOW AT CARBON THEATRE

"A Saturday Night Kid" in department store parlance, is a girl who does not have a "steady" boy friend, but who manages to "grab off" dates with "swell gents" every Saturday evening.

Clara Bow will be seen in the title role of a play based on this type of character when "The Saturday Night Kid" comes to the Carbon Theatre on Friday and Saturday of this week.

The play is established on the doings of the boys and girls who work as sales persons and clerks in the big department stores of the metropolis. Miss Bow is a hard-working sales girl who is deeply in love with James Hall, clerk, who has ambitions to rise higher on the store's staff.

Clara's younger sister picks Hall for a winner in the battle for higher wages and success, and sets her own traps for her sister's "boy friend." Clara, unaware that her sister is working out a well-calculated intrigue, sees Hall's indifference and decides to go Democratic with her dates to bring him to his senses. But complications enter the field of activity. Clara's sister gets into a jam over money entrusted her by the store—and heroic, if frenzied measures are called for to save the day. Miss Bow saves it and her own reputation at the same time in a series of thrilling sequences.

The atmosphere is genuine, real. The acting is superb and gives Miss Bow the greatest recommendation for new laurels which her art has yet earned for her.

The Carbon school re-opens on Monday, January 5th.

NEW HOCKEY RULES

Now that the hockey season is at hand, the following new system proposed at the National Hockey meet in Toronto should be of interest.

The measure followed several unsatisfactory endings of games last winter, when so many men were penalized that the game became a farce.

Under the new system, should two men of a team be penalized, they go to the box in the usual way. When, if ever, the third teammate is "chased" a substitute will take his place. Then penalty time of the third man will begin when the shortest preceding penalty ends. As an example, should the first man get a major penalty, and the second a minor, the third man will start serving his time when the second man resumes his place on the ice.

There will be no excuse for players

injuring opponents about the head and face in future. Another ruling says: Any player cutting another player about the head or face with his stick will automatically receive a major penalty. The same thing applies to the aggressor in a fight. If the referee defines the aggressor, the latter takes a major penalty. The person struck will not be penalized unless he retaliates, in which case he will be chased for two minutes.

Still another ruling covers the chopping of hockey sticks from a player's hands. In this case the chopper will be penalized, while the chopped will also go to the box if he interferes in any play while lacking his stick.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

Old-Time Yuletide Glories Return

One hundred years ago the Lord of the old Papineau Seigniorie at Montebello celebrated Christmas in the good old-fashioned way, surrounded by his family and dependents through a series of festivities lasting several days. The Yule-log crackled in the great fireplace; the merry voices of men and maidens rang through the great halls of the manor house; carols, so old that the origin of some of them was even then untraceable, were sung; bright garlands of evergreen decorated the apartments and corridors and—in a word—Christmas was King. Then, for a century, the song of the minstrels and the laughter of the guests was hushed and only the falling snow told the historic seat of the Papineaus of the advent of the Christmas season. This year, however, Lucerne-in-Quebec has stretched its magic wand over the historic site and the ancient glories are to be revived, on a scale which will outlive all their predecessors. With the Log Chateau as headquarters, 88,000 acres of beautiful countryside will be thrown open to visitors to the unique hostel. Bob-sleighting on one of the longest

runs on the continent; ski-ing; ski-joring; ski-jumping; skating; snowshoeing and dog-sled drives will be offered to the devotees of winter sports, while the most complete comforts and appointments of up-to-date hotel-keeping; good food and bright entertainment will await the guests at close of day. Among the special features arranged for the Christmas festivities are the rendering of carols by The Children of His Majesty's Savoy Chapel Choir (London, Eng.); old-time songs by Charles Goulet's troupe of French-Canadian artists and the interpretation of Tudor dances by experts from the Margaret Eaton School of Dancing. Thus, once again, will the old walls of the historic mansion hear the strains which roused them to Christmas celebration a century ago, and before that. Lucerne-in-Quebec is ideally situated, on the northern bank of the Ottawa River, about half way between the Canadian Capital and Montreal, and only an overnight run from the great cities of the Eastern United States. r

Wheat.

Wheat, at the present time, bulks larger in the eyes of the people of Canada, in the east as well as in the west, than ever before. The word "wheat" is on everybody's tongue; it is the outstanding subject discussed by railway executives, bank presidents in their annual statements, manufacturers, wholesalers, statesmen and politicians great and small. If never before, the Canadian people have now awakened to the fact that wheat is the most potent factor in the commercial, economic, financial life of this Dominion; that it is the country's very life blood upon the flow of which its prosperity, if, indeed, not its present existence depends.

The industries of Eastern Canada languish because western agriculture is in difficulty, severe difficulty. The east is beginning to remember, what perhaps it had forgotten, that in years past when its cities and towns were growing in population and wealth, when its factories were busy and working overtime, when new industries were being established and large additions to plant made to existing ones, were the years in which western Canada was prosperous. It was the enormous new and increasing purchasing power of the west that made eastern industry hum.

Now that western wheat is in the doldrums, a drug on the world's markets, which it is impossible to sell at a price that will even cover the costs of production, not to mention any profit to the producer, the whole country is suffering. This condition cannot long continue; it must change, and because this is so, because a way out must be found, and therefore will be found, western farmers can entertain hopes for the future.

Whatever happens to Canadian-grown wheat on the market, it still retains its pre-eminent quality. It remains the finest wheat in the world, and because this is so the present situation is all the more tragic. The outstanding quality and pre-eminence of western Canada's wheat was again demonstrated this year when once again the world's championship was won by an Alberta farmer.

It is twenty years since the wheat championship competition was inaugurated, and during those twenty years the three prairie provinces of Canada have carried off the championship no less than sixteen times, Saskatchewan winning it ten times, Alberta five times, and Manitoba once. In the other four years the honor went to one individual state across the line, Montana.

This is a wonderful record for western Canada. It speaks volumes not only for our climate and the fertility of our soil, but for the enterprise of our farmers, their patience and skill. It has meant the use of good seed; it has given an impulse to the art of scientific cultivation; it has meant millions of dollars to hundreds of farmers whose names never appear in the prize-winning class, but who have been encouraged to adopt and follow right methods, and to sow only good, clean, registered seed in their fields.

It has added vigor to the fight against noxious weeds, insect pests, rust, and other factors operating against the production of the highest quality wheat. It has encouraged the scientists in their task of developing new and better varieties, earlier ripening varieties, frost and rust resistant strains.

These things may, at the moment, seem of little account to hundreds of farmers who are making a real struggle to meet their obligations and find the necessities of life for themselves and their families. But the fact remains that the industry of agriculture in western Canada rests on a solid and enduring foundation; it is the superstructure involved in present production costs, transportation costs, marketing difficulties, general world conditions of over-production and loss of purchasing power wherein the trouble of today lies. Those things can, must, and ultimately will be rectified.

Approve Federal Plan

Alberta Horse Breeders' Association Endorse Policy For Assistance To Livestock Members

Approval of plans announced by the federal minister of agriculture for advancement of the livestock industry by assisted distribution of purebred sires, was voiced in resolutions passed by the Alberta Provincial Horse Breeders' Association in annual convention at Edmonton. The proposal to purchase several of the best stallions of draft breeds and the revival of the bull-leasing policy were specially commended as well as extension of the thoroughbred horse station policy.

Hints To Grain Exhibitors

Advice In Respect To Entries At World's Grain Exhibition

Hints given to prospective grain exhibitors at the World's Grain Exhibition and Conference at Regina in 1932 by Cecil Tice, secretary of the British Columbia committee, include the following: (1) Exhibits must reach Regina on or before March 1st, 1932; (2) Transportation charges must be prepaid; (3) All exhibits must bear the name of the variety. This is often omitted at fairs, causing needless confusion and loss of time; (4) Only one entry may be made in any one class, although exhibitors may enter in as many classes as desired; (5) Exhibits may be taken from any year's crop.

Radios In Canada

Popularity Of Radio Is Increasing According To Federal License Bureau

The radio is becoming increasingly popular in Canada. In the first eight months of the fiscal year more licenses were taken out than in the preceding year.

The figures were:
1930—Eight months, 444,676 licenses.

1929—424,146 licenses.
There are still four months to go and officials of the radio department believe licenses may reach the total of 500,000. Each license costs \$1.00.

Manitoba shows a greater increase than either of the other two prairie provinces. So far this year 27,929 licenses have been issued in Manitoba, against 26,419 last year. In Saskatchewan the figures for this year are 25,921, against 32,951 last year; in Alberta, 19,555, against 21,479.

Winnipeg records the greatest advance among the cities with 16,953 licensed so far this year, against 15,084 last year. The figures for Regina are 3,144, against 3,032; Saskatoon, 2,076, against 1,889; Moose Jaw, 1,685, against 1,072.

Discounts Russian Menace

Canadian Investigator Says He Thinks Soviets Are Sincere

Earnestness and sincerity are the characteristic features of the Russian people in the economic and social experiments they are making, says Dr. A. G. Lockhead, agricultural bacteriologist of the Dominion Government Experimental Farm at Ottawa, following a visit to the Soviet Republic. "The Russians firmly believed what they are aiming at will give the greatest good to the greatest number," he affirmed. "They believe the rest of the world will, of necessity, follow their methods."

Dr. Lockhead was Canadian delegate to the second international congress of soil science at Leningrad and Moscow. Every line of scientific research appears to be encouraged in the Soviet, he says.

The recent unloading by Russia of wheat, lumber and coal on world markets is essentially an effort to raise credit, rather than a deliberate part of a market-breaking scheme, Dr. Lockhead opines. In this connection, he believes the menace from the U.S.S.R. is not at present serious.

Fastest Warship Launched

Nothing Can Outdistance Destroyer Built By British Navy

The New York Times publishes the following special cable from London, England:

What is believed to be the fastest warship in the world has just completed her trials for the British navy, reaching a speed of 40 knots at times without pressing her machinery in any way.

This is the new destroyer Flotilla leader, "Codrington," 1,520 tons, completed last June at the Swan and Hunter shipyard in Glasgow.

Nothing in the other navies have been produced to out-distance this British whippet, which with a full load could streak across the Atlantic in three and a half days if top speed could be maintained.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

Planning Long Air Line

One of the longest airlines in the world, linking Berlin and Tokio, is a possibility, according to reports reaching here from the Japanese Aviation Bureau of the Ministry of Communications. The line as discussed now would be operated from Tokio to Hong Kong by the Japanese, over India by England, and the rest of the way by Germany.

Where Women Predominate

In Europe there are 18 million more women than men, according to a statistical calculation. Germany has 3,000,000 more women than men, France 2,000,000, and Russia 4,000,000. Portugal is declared to be a land where women form the highest proportion of the population.

Ties Of Empire

Ideal Has Never Been Stronger In the Hearts Of the People

"It is unthinkable that we should lose Canada and if the Dominion had her way there would be little danger," declared Sir William Crawford, president of the Publicity club of London, England, which discussed the question: "Shall we lose Canada?"

"At no time in the history of our country," said Sir William, "has the ideal of empire been stronger in the hearts of our people."

The meeting was addressed by P. W. Field, his majesty's senior trade commissioner in Canada and Newfoundland. Mr. Field said British exporters must expect increasing competition from Canadian producers in many trades and he showed that the United States exercised a great influence over the Canadian market. The Americans had established a thousand factories in the Dominion and, in the face of this strenuous competition, only the most efficient business methods by British firms would enable Britain to remain in the field.

Mr. Field agreed that Canadian tariff changes which had come into operation since May would, undoubtedly, limit British business, but he believed it was still possible to obtain a large share of Canada's import trade by strengthening and revising methods.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, felons, blood poisoning, soft corns, warts, scald feet. Invaluable for inflammation and muscular rheumatism.

Restoration Of Chinese Credit

This Would Have a Most Favorable Effect On the Wheat Market

Rehabilitation of Chinese credit would have a decidedly favorable effect on the wheat market, J. I. McFarland, general manager of the Central Selling Agency of the Canadian Wheat Pool, stated in Ottawa. Mr. McFarland was commenting on reports from Washington that the British Government had entered into discussions looking toward re-establishment of credit in China.

Prior to the serious drop in the price of silver, Mr. McFarland said, China had become a large importer of Canadian grain.

Export Of Apples

Four steamers loaded 28,837 barrels of apples at the Port of Halifax for British and Continental markets during the week ended November 30th, bringing the exports for the year to 500,551 barrels. The latter total compares with 508,182 barrels for the corresponding period of last year.

Famous Sheep Farmer Leaves For England

William Darnbrough Has Been In Saskatchewan Twenty-Six Years

Famous throughout the American continent as one of the Dominion's leading sheep farmers and renowned for his many victories in the grain classes at Toronto Royal and Chicago International shows, William Darnbrough, of Laura, Saskatchewan, has given up his farming interest there and left for his old home in Yorkshire, England. Mr. Darnbrough will return, however, for the World's Grain Show to be held in Regina in 1932.

Coming to Saskatchewan in 1904 without any knowledge of farming, Mr. Darnbrough quickly established a farm second to none in the district and he attained prominence as a sheep breeder. Since the war he has won an unbroken string of successes with his sheep and grain at the biggest shows on the continent.

Albert Robbins, another prominent Laura farmer, has taken over the Darnbrough holdings.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Praise For Sir Arthur Currie

"No words can express the gratitude felt by the British Legion to Sir Arthur Currie and his colleagues for their kindness to members of the British Legion and their families when they arrived as settlers in Canada," said the Earl of Jellicoe, head of the British Legion, when he spoke at a luncheon given Sir Arthur Currie by the Empire Service League in London, England.

Big Apple Shipment

The largest apple shipment yet forwarded from Nova Scotia to the European continent is on its way, consisting of 18,000 barrels destined for Antwerp, Belgium.

Cut Down Food Wastage

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

A New Era Of Co-Operation Between Canada And U. S. In Air Service Development

A new era of co-operation between Canada and the United States in the development of our services began when plans for the inauguration of new passenger and air mail lines were announced at Ottawa. The announcement came following a conference between P. T. Coolican, assistant deputy postmaster-general of Canada and W. Irving Glover, assistant postmaster-general of the United States.

If the decisions reached by the two postal officials are approved by their respective governments, Canada will have a regular air service from coast to coast linked up at important points with the trans-continental air lines of the United States. In addition a north and south line from Alaska to Florida is contemplated.

The speeding up of trans-Atlantic mail services was also discussed, but on this point the programmes of the two countries are quite distinct. Canada will effect a saving of 48 hours in the present steamship service by ship to shore flights, while the United States is planning an all-air route to Europe from New York via Bermuda, the Azores, Lisbon, Portugal and through France to England.

The first link in an air line which will traverse the entire length and width of North America from Miami, Florida, to Alaska, will be inaugurated shortly. It will run from Calgary to Miami and it will be possible to travel between the two points in 42 hours, a saving of 90 hours over present methods of communication. Eventually it is hoped to extend this route from Calgary north and eastward into Alaska by way of Fort McMurray and thence into Asia.

The first step in the programme has been taken with the definite decision to put into effect an aerial link between Winnipeg and St. Paul-Minneapolis.

While the details of the Winnipeg-St. Paul schedule were being worked out the officials were also discussing the more ambitious scheme to develop a route from Calgary, through Fort McMurray into Alaska, and thence into Asia. It was agreed that unless Canada and the United States joined in the development of the Asiatic route, a few years might see serious competition from Russia in that region. Russia is making considerable strides in aviation, Mr. Glover said, and 22,000 miles of flying is being done in that country daily.

Three years are regarded by the officials as sufficient time to bring the Asiatic service into being. In the meantime definite progress is being made, Mr. Coolican said, to set up aerial communication routes from Calgary to Vancouver. The route through the Rockies was not, he said, regarded as particularly difficult. As soon as communication is established to the coast by air, new links between Canada and the United States would be made at Lethbridge, Alta., and Vancouver. The Lethbridge link will be to Great Falls, Montana, while the western extremity of the United States system will be contacted at Seattle from Vancouver.

The flights arranged between Winnipeg and St. Paul will complete the aerial chain between the prairies and the east. Mail for eastern Canada will be carried over United States air lines to Detroit and will there re-enter Canadian territory. While the schedule has not been definitely settled, Mr. Coolican said that mail from Calgary would reach Montreal in 40 hours, a saving of 38 hours. A saving of 40 hours would be effected in mail for Toronto.

Less Wheat In Britain

The British ministry of agriculture reports that England's wheat production for 1930 was 21,404,000 hundred-weight, which is 4,000,000 hundred-weight or 1½ per cent less than last year's crop. Virtually all grain production was shown to be under last year's figures with barley dropping 26 per cent, and oats 12.

A glass factory in Alton, Ill., produces 300 tons of bottles a day, in more than 3,200 sizes and styles.

W. N. U. 1870

This Complex Life

Man, With All His Ingenuity, Cannot Solve Economic Problems

Man can take a drop of blood and tell the story of the owner's death by the discovery of the presence of a minute particle of poisonous gas; man can circle the earth without touching the ground; man can kill other men twenty miles away; man can weigh the stars of Heaven; man can drag oil from the bowels of the earth; man can compel an icy waterfall to cook his meals a hundred miles from the stream; man can print a million newspapers in an hour; man can breed the seeds out of oranges; man can coax a hen to lay three hundred and sixty-five eggs in a year; man can persuade dogs to smoke pipes and sea lions to play guitars. Man, in other words, is quite an ingenious and remarkable package of physical and mental machinery.

When this astonishing person, however, is confronted with one problem, he retires, defeated, to his hut. Show him six men without money, and six loaves of bread belonging to men who cannot use it, but who want money for it, and ask him how the six hungry men can be put in possession of the six surplus loaves, and watch him then! It is then that man attends conferences, and appoints committees and holds elections, and makes speeches and cries out that a crisis is upon him, and does a score of useless things, and then retires, defeated, to his hut, leaving in the shivering twilight the tableau of the six hungry men and the six unapproachable loaves.—The Western Producer.

Canadian Farm Loan Board

About Seven Million Dollars Disbursed To Farmers In Six Provinces

At the end of the present fiscal year on March 31st next, when the organization will have been functioning a little less than two years, the Canadian Farm Loan Board will have disbursed nearly \$7,000,000 in loans to farmers in six provinces of the Dominion, according to Dr. J. D. McLean, chairman of the Board. Up to the present the average loan has been a little over \$2,000 and it is pointed out by Dr. McLean that back of the \$4,428,000 loaned up to the end of September, the Government has securities in the form of lands and buildings valued at about \$16,000,000.

Western Canada Turkey Show

The first Western Canada All-Turkey Show, held at Duncan, B.C., the other day, was a marked success, there being several hundred people present.

Eskimo Maid Is Crowned Beauty Of Arctic Circle

Enoosiak, 24-year-old brunette, is the reigning beauty of the Arctic. Andrew Brown, the big face and figure man of the north, selected this brown-eyed, brown-skinned Eskimo girl from an entry of two dozen, in the first beauty contest ever held inside the Arctic circle.

From Baker Lake, little trading post on Chesterfield Inlet, just a thousand miles north of Winnipeg, came word of Enoosiak's triumph. "Shining Star," her name means and proudly, for the first time in her life, she can survey her prize-winning features. A mirror was her reward, the first she has ever owned.

Brown, who organized the contest, declares Enoosiak the most beautiful Eskimo lady he has ever seen. She lives not far from Baker Lake. — Photo Canadian National Railways.

Place Order For Equipment

C.P.R. Lets Contracts For Both Passenger and Freight Cars

Orders have been placed by the Canadian Pacific Railway for the construction of 55 passenger cars and 425 freight and service units, it was announced at Montreal.

The Canadian Car and Foundry Company will build ten baggage and express cars and the steel frames of 45 other passenger cars, interiors of which will be finished in the company's Angus shops.

Forty-five gondolas and 35 air-dump cars will be built by the Canadian Car and Foundry Company, while 250 refrigerator cars will be constructed by the National Steel Car Company and 100 flat cars by the Eastern Car Company.

In addition to the above, three snow-plows and 25 tank cars will be constructed by the company in its own shops.

Fertilizer Plant

Good progress is being made in connection with the fertilizer plant of the Consolidated Mining and Smelting Corporation, Ltd., at Warfield, B.C. Some of the buildings are now nearly completed and in one or two cases, machinery is already being installed.

Estimated Age Of The Earth Is Advanced From Time To Time As Scientific Knowledge Increases

Complete Sheep Survey

Economic Survey Of Sheep Ranching Industry Of Western Canada

Return to Ottawa of Lawrence E. Kindt, of the economics branch of the Department of Agriculture, marks completion of the field work in the economic survey of the sheep ranching industry in Western Canada which is being carried out in co-operation with the experimental farms branch.

Mr. Kindt has visited ranches in southwestern Saskatchewan, Alberta and the interior of British Columbia. Complete records were obtained from 140 representative ranching outfits for the year 1929 and 14 for the current year.

Real work of the survey — the studying of facts and figures secured by observation and contact in the field and preparing conclusions therefrom — will now start and it will take two or three months to carry out the phases.

To Study Economic Conditions

Suggestion Made That National Research Council Undertake Work

The suggestion that a committee of the National Research Council study national and international aspects of matters having a bearing on prevailing depressed economic conditions was held out recently by Tom Moore, president of the Trades and Labor Congress of Canada. In an address to an Ottawa Service club the labor union leader remarked that the Dominion is without a co-ordinated authority of this sort. In this regard, it was important that the country keep abreast of the times.

Ayrshire Breeders' Association

Secretary Of Canadian Organization Gives Report For November

The secretary of the Canadian Ayrshire Breeders' Association reports that during the period from November 1st to November 25th, he received 81 reports of cows and heifers that qualified in the R.O.P.—35 in the 365-day division and 46 in the Honor Roll or 305-day division. In the former, 15 qualified in the mature class; five in the four-year-old class; six in the three-year-old class and nine in the two-year-old class. Twenty-eight of the records were made on two milkings a day.

British Columbia Tomatoes

Twenty-three thousand dollars, representing the proceeds of this year's tomato crop in the Oliver section of British Columbia, were distributed to growers by the Dominion Canners Limited. The average production was 7½ tons to the acre, for which the growers received \$17.50 per ton.

The estimated age of the earth has been growing at a shocking rate ever since geology became a science. In 1860, John Phillips placed the age of the globe at 38,000,000 to 96,000,000 years. Twenty years ago his highest figure had been considerably enlarged by geologists. But the end was not yet. Radium was discovered and science learned that this element breaks up at a definite rate that is measurable. Physicists observed the rate of disintegration in various rocks and multiplied the previous estimates by ten.

When this venerable sphere reached an age estimated at no less than 500,000,000 years, Prof. Louis V. Pirsson remarked: "Truly there is now an embarrassing richness of time." But this did not stop science from inflicting further senility upon Mother Earth. The latest estimate of time since a passing star tore the nucleus of the earth from the side of the sun is 2,000,000,000 years. This figure used by astronomers is now substantiated by Prof. Alois F. Kovarik, of the Yale physics department. Prof. Kovarik's measurements of the constant disintegration of radioactive elements in a piece of uraninite indicates an age of 1,852,000,000 years.

Many geological "time clocks" have been used to estimate the longevity of this planet. One favorite measuring stick is the rock strata that are exposed in such gorges as the Grand Canyon of the Colorado. The degree of evolution attained by fossils found in some of these strata also furnishes evidence. But the sequence of rock formation is frequently broken, and it is impossible to determine how much time has elapsed between the formation of successive layers. Geology postulates that most of the earth's surface has been under the sea a number of times, and it is probable that some millions of years would elapse from one inundation to another.

For measurement of recent time the rate of erosion is useful. For example, the average level of the United States is being lowered at the rate of one foot in about 7,500 years. On this basis it is estimated that 15,000,000 years would be required to reduce the continent to sea level by erosion if the upheavals by which mountains are made were stopped.

The layman is not much interested in these figures, or in the technical processes by which they are worked out. But he may find some comfort in the fact that the earth is not a recent concoction, and that its present form will probably be modified but little in the next million years. No one knows how long life has been on the earth, but, of course, the life of man is only an infinitesimal span in comparison with the length of time since this sphere came into being. The important thing seems to be that man, now that he is here, is determined to stick with the old globe as long as it continues spinning. — Washington Post.

Good wishes also come home to roost.

India uses 17 different calendars, all recognized by the governments.

Wife: "If I had to go away for some weeks would you be lonely?" Husband: "Not at all." Wife: "Good, then I won't go." — Moustique, Charleroi.

OAK BAY GOLF COURSE

The Oak Bay golf course on the sunbathed southern tip of Vancouver Island, which will become the center of interest for western Canadian golf fans when the annual Empress Mid-Winter Golf Tournament for the E. W. Beatty Trophy takes place February 23-28 inclusive. Offsea breezes, rock hazards and tricky mashie shots tend to make this course beside the Straits, one of the sportiest in Canada. Inset is Harold Lineham, a 3 handicap man, last year's winner of the Beatty Trophy, playing over the Colwood Course, and who this year will defend his title under vastly different conditions.

WORLD HAPPENINGS
BRIEFLY TOLD

E. C. Mievile, secretary to the governor-general of Canada, will proceed to India with Lord Willingdon to his new post.

World-wide reduction of armaments as an obligation under the terms of the Treaty of Versailles has been urged by the Carnegie endowment for international peace.

In a recent month automobiles registered in England numbered 17,846, an increase of 725 over the corresponding month of the previous year.

A man beat a horse in a 15,000 meter race at Temuco, Chile. The victor was Felix Saavedra, an Aracanian Indian. He led the horse by 100 meters at the finish.

Dr. Arthur Torrence, of London, England, fellow of the Royal Society of Great Britain, has announced plans for an expedition in February to Africa, in which he said he hoped to determine the origin of the race.

An official return just issued shows that the majority of the 320 pilots attached to the Port of London, England, had net average incomes approaching, or more than, £1,000 during 1929.

Professor Werner Brockhardt, with a European assistant, fell into the crater of the volcano Merapi in Sumatra at the moment that it became suddenly eruptive, and perished in the boiling lava.

Michael Finnerty, 104 years of age, died at Duncan, B.C., December 20. He was one of British Columbia's pioneers, having resided in the province for 67 years, the greater part of which was spent on Vancouver Island.

Twenty-six thousand one-pound cans of freshly packed salmon were donated to Seattle's needy citizens as a general relief program was launched there to aid the destitute and unemployed. The salmon—13 tons of it—was donated by salmon packers and distributed by welfare organizations and institutions.

Novel Type Of Vehicle

Can Run As Omnibus On Rubber Tires Or On Railway Track

A novel type of vehicle adaptable for either road or rail, which is to be tested within the next few weeks near London, England, may revolutionize transport methods.

It is manufactured by a Huddersfield firm of commercial vehicle makers.

Whilst on the road it resembles an omnibus and runs on rubber tires. In 30 seconds railway carriage wheels can be fitted, and it will travel on the track at 60 miles an hour.

The London, Midland and Scottish Railway Company are co-operating with the firm in the tests.

Berlin-Moscow Air Service

The Berlin-Moscow and Berlin-Leningrad daily air service has closed down until next spring. During their operation 2,860 passengers were carried, 27,145 kilograms of mail and 60,000 kilograms of freight, an increase over the previous year of 12 per cent. in passengers, 80 per cent. in mail, but a decrease of 25 per cent. in freight.

Tree Plantation Inspections

The inspectors of tree plantations sent out from the Dominion Forest Nursery Station, maintained by the forest service of the Department of the Interior, at Indian Head, Saskatchewan, made 13,305 inspections during the 1919 season.

"Why didn't you receive me on January 1st?"

"I was in my bath when you called."

"No, I am speaking of this year."

—Journal Amusant, Paris.

W. N. U. 1870

You Never Can Tell

No Matter How Badly You Feel You May Be Able To Fool the Doctors

The death has taken place of William McQuhae, an Irishman, at the age of 93, who retired from the Indian civil service in 1870, on the advice of his doctor that his health would not stand the strain of serious work.

There is a solicitor named James Underhill, of Wolverhampton, England, now in his 98th year, who, seventy-five years ago, was refused insurance of any kind. Mr. Underhill rode a bicycle until he was 83, played the flute in public at 90, survived an attack of pneumonia the same year, broke a leg and made a good recovery at the age of 94, and up to the present year transacted his business, sometimes signing documents at the rate of one hundred an hour.

A layman has to place reliance on what his doctor tells him. But these cases just show that even if that worthy hints you have one foot in the grave, there may be a few good kicks left in you yet.

GAY YOUTH

All Tingey models are created and sketched in Paris and the patterns are made in New York.

What bright young thing of school-girl age does not revel in brilliant color? 'Nary a one!

Here is something to cheer the heart of many a bonny lass. It is a model youthful and dashing in cut and color, and includes at the same time a great deal of charm.

Scarlet wool marocain or crepe made the original. The collar and cuffs were of very pale beige—almost cream crepe de chine (any washing silk would be suitable) while the bow was beige spotted scarlet.

Similar schemes in navy and white, green and white or beige, blue and red, etc., would be smart. Other modish and suitable materials include silk marocain, heavy crepe de chine, fine woollen reps, charmelaine, jerseys, etc.

This pattern may be obtained in sizes 8 to 11. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Inter-Empire Trade

Reference Made In London, England, To Conference To Be Held At Ottawa

Asked in the British House of Commons about the British government's intentions in regard to the subject of Empire reciprocal tariff preferences and the Ottawa economic conference next year, J. H. Thomas, secretary for the Dominions, declared the government was taking further steps to study the problem of closer economic co-operation within the Empire.

Regarding the scope of the Ottawa conference, Mr. Thomas invited the House's attention to the resolution recommended to the last Imperial conference by the heads of delegations, dealing with the preparations for the Ottawa conference. This set forth that while matters left over by the Imperial conference would be dealt with at Ottawa, the Ottawa conference would not be limited to such subjects.

Will Grow More Wheat

Soviet Russia Contemplates Increasing Wheat Acreage

The United States Department of Agriculture was informed that Soviet Russia contemplates an increase of 19 per cent. in her wheat acreage to be seeded next spring above this year's total.

The foreign agricultural information office at Berlin advised that the present intentions of Russia called for seeding 816,807,600 acres.

The acreage sown in Prussia and Germany up to the early part of December was reported as 6.6 per cent. greater than a year ago; but a decrease of 10.2 per cent. was noted in Germany's rye acreage.

Crop Insurance

New Legislature To Be Introduced In the Saskatchewan House

Legislation to empower companies that so desire, to write crop insurance along the line of hail insurance, will be introduced at the coming session of the Saskatchewan legislative assembly.

Announcement to this effect was made by Hon. J. F. Bryant, K.C., minister in charge of the Saskatchewan Insurance act recently. Crop insurance has been widely discussed by the farmers of the province and has led to the government move.

Sand which can be used in making brown and amber glass is obtained from the Pacific Coast, but for white glass sand is still chiefly imported from Belgium.

SUNDAY SCHOOL LESSON

JANUARY 4

THE BIRTH OF JOHN THE BAPTIST

Golden Text: "Thou shalt go before the face of the Lord to make ready His ways."—Luke 1:76.

Lesson: Luke 1.

Devotional Reading: Luke 1:68-79.

Explanations and Comments

The Preface to Luke's Gospel verses 1-4.—Luke himself, he tells us, was a careful historian, who obtained his information from those who were eyewitnesses of the events he records.

The Birth Of John the Baptist Foretold, verses 8-13.—When the time came for Zacharias' group to officiate in the temple, lots were cast, as was customary, to determine which priest should offer the incense. "No priest might have this honor twice; and the number of priests was so great that many never offered the incense." The burning of the incense was "the highest mediatorial act, the most solemn part of the day's service, symbolizing Israel's accepted prayers," and the priest who had this privilege was ever afterwards called "rich." The coveted lot fell to Zacharias.

When Zacharias entered the Holy Place, the people stood without in the temple court, praying. The altar of incense was in the Holy Place in front of the curtain which shut off the Holy of Holies. On its right stood the table of shewbread, and on its left the golden candlestick. The two assistants whom Zacharias had chosen, as was the custom, each performed the part assigned to him; one removed what had been left on the altar from the service of the evening before and departed backward. The other spread live coals on the altar and then left. Zacharias was alone. He advanced with the golden censer and spread the incense on the glowing coals. At that solemn moment, our record says, an angel of the Lord appeared unto him.

"Dost smile at tale of seraph ministrations?"

God sends the angels, thou must bring the eyes."—Langbridge.

Zacharias was troubled and fearful. "Fear not," were the words he heard, and then came the promise that because his supplication had been heard he should have a son whom he should call John. "John," means Jehovah's Gift, or God is Gracious. Although Zacharias had, no doubt, often prayed for a son, it is natural to suppose that his prayer in the temple at this time had been for the coming of the Messiah, whose herald the son was to be. Dr. Plummer comments that the "and" (and thy wife shall bear thee a son) may mean that this is an additional boon, which is to prepare the way for the blessing prayed for and granted, and thus, like Solomon, Zacharias received the higher blessing for which he prayed, and also the lower blessing for which perhaps he did not pray at this time.

The Character and Mission Of John, verses 14-17.—The son promised to Zacharias would bring joy and gladness not only to him but to many, for he would be truly great—great in the sight of the Lord.

Static Stopped
Radio Cooking

Interesting Demonstration By Electric Wizard Falls At Critical Moment

Radio cooking static made its first public appearance in New York recently.

It interfered with popping a bag of corn in the presence of 1,200 diners at a luncheon of the New York Merchants' Association.

Just before the luncheon the radio cookstove was working perfectly under the direction of General Electric Company wizards. A test paper sack of corn placed between two jars of ice water to make sure there was no warmth in the air, popped perfectly by the heat generated within the kernels by radio.

But at the luncheon in the expectant hush of the audience something went wrong. It was just what might be expected of static. No corn popped.

Frozen Light, one of the queer new discoveries of science, also was exhibited and worked perfectly.

This light was frozen into the surface of a mineral screen at Schenectady and brought to New York in a bottle of liquid air at 312 degrees below zero.

The screen, lifted up before the diners in darkness, was at first just a black dot. But as it thawed its face burst into all the colors of the rainbow, which chased each other across the surface in luminous billows.

A Striking Phrase

Sir Robert Borden Uses Striking Sentence At Meeting Of League Of Nations

A phrase used by Sir Robert Borden, Canadian delegate to the last meeting of the League of Nations assembly, was repeated in the British House of Commons by Hugh Dalton, under-secretary for foreign affairs.

One of the most striking phrases used at Geneva during the debate was that of Sir Robert who, returning after a 12 years' absence, looked around him and said: "The nations seem all to have renounced war, but they have not yet renounced armaments."

"That went to the root of the matter," Mr. Dalton added.

Manitoba Egg Laying Contest

White Wyandottes owned by W. T. Shaw, of Brandon, led the Manitoba egg laying contest at the Brandon experimental farm at the end of the third week. This pen led for both total and weekly production, the total being 84.1 points and 92 eggs.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

NEW AIR MAIL LINK THROUGH U. S. ARRANGED

Ottawa, Ont.—With the approval of the government of an arrangement between post office departments in Canada and the United States for a new air mail link between Winnipeg, Minneapolis and St. Paul, plans are being pushed forward for a service that will shorten by two days the movement of mail between Eastern and Western Canada. Announcement came as a climax to negotiations which have been going on for some weeks between P. T. Coolican, Canadian assistant deputy postmaster-general, and W. I. Glover, assistant postmaster-general in the United States.

The agreement between the two countries solves the problem that has arisen as a result of the difficult flying area between Manitoba and Ontario points. Mail will now reach Eastern Canada from Winnipeg via St. Paul, Detroit and Toronto.

The new flights are expected to begin about February 1. Mail will be transferred at the border from and to the machines of whatever Canadian company receives the contract.

Institution of the new flights is regarded here as a step looking towards a passenger service by air across Canada. In that connection, particular significance is attached to the recent amalgamation of aviation companies into the Canadian Airways, Limited, with Sir Henry Thornton, president of the Canadian National Railways, and E. W. Beatty, K.C., president of the Canadian Pacific Railway, on the board of control.

Wheat Shipment To China

Largest Single Cargo Of Wheat To Leave Canadian Port

Vancouver, B.C.—What is claimed to be the largest single cargo of Canadian wheat to leave a Canadian port will be loaded here for Shanghai delivery aboard the Canadian-American Line steamship "Chief Capilano" within the next few days.

The ship will take on 490,000 bushels, or 14,700 tons, and is expected to clear for the Orient by January 5.

Some three months ago the "Chief Capilano" carried a cargo of 13,200 tons of wheat to China, this constituting the largest shipment ever made from a Pacific Coast port.

The ship was chartered on a basis of \$3 per ton, and will commence loading early this week.

Farmers Selling Horses

Large Number Purchased For Canning Plant In U.S.

Ravenscrag, Sask.—A large number of horses have been sold at Ravenscrag recently, the most of them being purchased by men from the United States, then driven to Great Falls, Montana, where they are to be slaughtered and then canned.

The horses ranged in age from four to 20 years old, and some of them were excellent farm horses. Roy Stewart sold 43 animals at this sale, and among them were a number of good horses. Farmers of the district are getting rid of some of their horses at any price in order to get a little money to tide them over the depression period.

Renew Censorship In India

New Delhi, India.—Lord Irwin, Viceroy of India, has issued instructions which have the effect of renewing, with certain changes, the press censorship ordinance and also the "unauthorized news-sheets and newspapers ordinance," both of which have recently expired. The Viceroy also promulgated an ordinance concerning the liabilities for non-payment of taxes.

Figures For Quebec Port

Quebec, Que.—According to figures issued by the Quebec Harbor Commission, 940 vessels entered and cleared at this port during the 1930 season of navigation, representing a tonnage of 4,230,000. During the season there were 1,700,000 more bushels of wheat shipped out of the port than in 1929.

Outstanding Journalist Dead

C. A. C. Jennings Was Chief Editor Of Toronto Mail and Empire Twenty-Nine Years

Toronto, Ont.—One of Canada's outstanding journalists, Claud A. C. Jennings, chief editor of The Mail and Empire, Toronto morning newspaper, during the last 29 years, and a member of the editorial staff for 38 years, died suddenly at his home here, Dec. 22.

He left his office shortly after 6 o'clock to go home for dinner, but on arriving there complained of pains and constriction in his chest. Taking to his bed, he sank rapidly and died before medical aid arrived.

Tributes from leading men in all walks of life poured into the Jennings' home. From Canada's prime minister, Hon. R. B. Bennett, from Ontario's premier, Hon. George S. Henry, and from Hon. G. H. Ferguson, former provincial premier, came messages of regret and tribute, as well as from other associates in political, church and journalistic fields.

Mr. Jennings started his newspaper career with a local trade publication after spending some years as a school teacher. He was born in the tiny hamlet of Cashel, in Markham township.

A SOLUTION OF INDIAN PROBLEM IS STILL SOUGHT

London, England.—The prime minister of Britain and two women of India united their voices in urging the Hindu and Moslem elements at the round-table conference to come to an agreement on the question of minorities and their representation in the parliament of the new India.

"Settlement of the minorities question," insisted Mr. Ramsay MacDonald, "is essential to the political progress of India. That is not merely a British view. It is the view held by every enlightened Indian, irrespective of the community to which he belongs."

"It is a question," said the prime minister, "which should be settled between yourselves. It will avail you nothing to start work on an Indian constitution and to ask any outside authority to dictate one of the essential conditions of the successful working of that constitution—namely, the degree and proportion of racial representation."

"The time for emotional speeches has passed," said the Begum Sham Nawaz, a Moslem. "The time for practical proposals and for solid, constructive work has arrived."

"Now that the all-important time of decision has come," she continued, "is it wise that you remain divided in your own ranks?"

Mrs. Subbarayan, a Hindu, said: "Whatever our creeds, we are all Indians."

Will Serve In British Navy

Senior Naval Officer At Halifax Proceeding To England

Ottawa, Ont.—Commander V. G. Brodeur, R.C.N., senior naval officer at Halifax, N.S., is proceeding to England on January 2, according to a memorandum issued from the department of national defence. Commander Brodeur will serve for some time with the Royal Navy.

Lieut. B. Shadforth, Vancouver division of the Royal Canadian Naval Reserve, is appointed as from Jan. 4 to the naval depot ship, H.M.C.S. Naden, at Esquimalt, B.C., for 28 days training.

Is Awarded Claim

Ottawa, Ont.—In a British Columbia case involving the sale of the Big Missouri Mine in the Salmon River district, the Supreme Court of Canada awarded William F. Harris, of Port Angeles, Washington, the sum of \$50,000 from the \$250,000 realized.

Song Writer Dies

New York.—Charles K. Harris, song writer and music publisher, author of "After the Ball," one of the most popular songs ever written, died at his home here after an illness of three weeks. He was 65.

NEW FRENCH CABINET

Theodore Steeg, who, upon request of President Doumergue, has formed new French cabinet, which ran into first difficulties in withdrawal of two under-secretaries just as new cabinet was about to be presented to president.—Copyright, Pacific and Atlantic Photos Inc.

Rescued By Dog-Driver

Deftly Thrown Whip Lash Saves Man From Drowning

Prince Albert, Sask.—Unerring aim of the whipland of Clarke Cheney, veteran dog-driver of the north, saved the life of a tractor driver at Lac La Ronge. The tractor driver was hauling a "swing" of fish across Lac La Ronge, 200 miles north of here, when the machine plunged through the ice. Cheney, witness of the accident, halted his dog team, uncoiled the long, snaky dog whip and whirled it toward the tractor driver who grasped the lash and was hauled to safety.

For World's Speed Record

Capt. Malcolm May Use Shores Of Great Salt Lake

London, England.—The shores of the Great Salt Lake in Utah may be the scene of Captain Malcolm Campbell's next dash for the world's speed record.

Captain Campbell proposes a trial at Daytona Beach in 1931, and is considering proceeding from there to Utah.

The beach of Utah's salty inland sea he believes well suited for speed record trials, for one thing being less exposed to wind and tide.

Punjab Governor Wounded

Hindu Student Is Alleged To Have Fired Shot

Lahore, India.—Sir Geoffrey de Montmorency, governor of the Punjab, was wounded by bullets from the revolver of a youth who fatally wounded a native police official at the same time.

The police officer, sub-inspector Chanan Singh, died in a hospital where he was taken after he was struck by a stray shot. A woman physician also was hit by a stray bullet, but received only minor injury.

It was the second time that Sir Geoffrey had been shot at and the attempted slaying occurred just a year from the day that an attempt was made to bomb a train carrying the viceroy, Lord Irwin and Lady Irwin, to New Delhi.

The Punjab governor had attended a convocation of the University of Lahore, and was leaving the Senate Hall, when a young man among the spectators, said to be a Punjab Hindu student, fired four shots at him point blank. Sir Geoffrey was grazed in the neck and hip.

He was taken to a hospital where his wounds were dressed and he walked home a few minutes later smoking a cigarette.

The assailant was immediately arrested and with him another youth who sprang to his side when the shots were fired.

Session To Deal With Radio

Will Take Definite Action On Situation In Canada

Ottawa, Ont.—Definite action will likely be taken at the next session of parliament to deal with the radio situation in Canada. Hon. Alfred Durand, Minister of Marine, whose department has jurisdiction over radio, is giving careful consideration to the question, which is, admittedly pressing.

He will submit his recommendations to the cabinet which in turn will reach a decision as to the policy to be adopted.

Will Produce Nitrate

Vancouver, B.C.—Nitrate which in the past has been brought all the way to Canada from the mines of Chile will soon be produced in large quantity in British Columbia as one of the chemical fertilizers to be turned out by the new plant of the Consolidated Mining and Smelting Company at Trail, B.C.

BORDER CITIES WANT ACTION ON MIGRATION LAW

Ottawa, Ont.—Misunderstanding and ill-will between two friendly peoples are developing from the actions of the United States Bureau of Immigration in violating, by means of "finely-drawn technicalities," the agreement of 1927, according to a delegation from the Border Cities Chamber of Commerce who saw the prime minister here.

By applying new regulations governing the entry of commuters between the Border Cities and Detroit, the United States authorities have broken the spirit of the three-year-old agreement, and in such a manner as to diminish commuting from 15,573 in the year 1927, to 3,600 in December this year. The delegation charged that the United States officials had again launched "an organized and determined campaign of debarrment," and as a result of this onslaught additional Canadians were every day being prohibited entry into the United States for a period of 12 months.

To remedy such a condition of things, the delegation asked the prime minister to make representations through the Canadian legation at Washington for reinstatement by the United States Bureau of Immigration of all those commuters who have been debarred by technicalities.

A second suggestion is that Canada negotiate a treaty with the United States which will clearly define the rights of Canadian and United States citizens in relation to this problem.

The third recommendation to the prime minister suggested, "that the Dominion government in any case rapidly develop its fiscal policy to encourage the manufacture of goods in Canada which are now produced in the United States, thus providing additional employment in Canada."

The prime minister gave sympathetic hearing to the representations of the Border Cities men, promising to take up the matter through the Canadian charge d'affaires at Washington.

Liberals Win By-Election

Government Candidate Loses By Narrow Margin At Estevan

Estevan, Sask.—In the most bewildering by-election ever held in this seat or probably in any constituency in Saskatchewan, Norman McLeod, Liberal, secured a majority of five votes over David McKnight, Conservative, when the outcome of the polling was finally made known. It was the heaviest vote ever recorded in an Estevan election, provincial or federal.

Thus Estevan remains in the Liberal column, and the Opposition still has 28 seats in the Saskatchewan legislature, as compared with the Anderson government's strength of 24 Conservatives, six Independents and five Progressives. That the Government side will demand a recount is virtually assured.

European Nations Sign Tariff Pact

Six Agree Not To Raise Rates Without Consultation

Oslo, Norway.—Convention binding six European nations not to raise existing rates nor introduce new ones without consulting one another has been signed and is viewed as a development of great importance in the economic affairs of northern Europe.

The signature of the treaty for "economic approachment" by representatives of Norway, Sweden, Holland, Belgium, Denmark and Luxembourg was announced by the Norwegian premier and Foreign Minister John Ludwig Mowinckel.

Long Service Record

Winnipeg, Man.—George Arnold who for 58 years has been on runs on passenger trains out of Montreal, has concluded the longest service ever achieved by a railway conductor in Canada, according to word received here by officials of the Canadian National Railways. The veteran conductor retired at the age of 77.

ALL ABOARD FOR SOUTH AMERICA

The first passenger ship ever to leave a Canadian port for South America—the new Canadian National liner "Prince Robert"—sails from Halifax on March 2, 1931, with a party of Canadian trade delegates, their wives and others pleasure bound. The Canadians will visit several Latin-American countries. Special attention will be paid to Buenos Aires, capital of the Argentine, where the Prince of Wales will open the British Empire Fair which will spread over 25 acres of ground and which will include a handsome Canadian pavilion and seven other Empire show buildings. Pictured here are Angus McLean, president of the Canadian Chamber of Commerce, pointing to the "Prince Robert's" chief port of call, and Elmer Davis, president of the Canadian Manufacturers' Association. These two organizations and the Canadian Government are responsible for Canada's part at the fair, one of the largest of its kind ever held in the world. Both Mr. Davis and Mr. McLean and their wives will make the trip.

CHAPTER VII.—Continued.

Later, as they walked back to Elm Street, Nick pushing the go-cart, and Simeon holding the umbrella, Nick said: "I wish you'd take Gay home with you, Uncle Sim. She's not herself. I can't help feeling worried. The other night—" He paused for a moment, while the old man watched him from beneath half-closed lids, "she—she got upset by— Well, our next door neighbor was singing. I suppose the music stirred Gay up. It was rather that sort, and she was feeling particularly tired. When we went inside she—cried. I thought she'd never stop. I was scared blue. It didn't seem quite natural for a mere song to upset her as much as that."

"Did it upset you, boy?" questioned Simeon, his eyes still on Nick's face.

Nick laughed, a short, nervous laugh, and answered: "Well, perhaps it did—a little. I was feeling restless anyhow. It had been a hot day, and the apple blossoms smelled so sweet and—"

"You got pinin' for that broad highway you used to talk about?" queried the old man.

A guilty smile hovered on Nick's lips.

"Only for a few minutes, sir. It's not often I think about it these days; but that night—"

"M-m," murmured Simeon. "Your wife knows you pretty well, don't she?"

Nick raised surprised eyes.

"Why, of course. Who should know me, if not Gay?"

"No one, so fur's I know. But ain't it possible that she wa'n't so much upset by the music, as she was by knowin' that the music had upset you?"

Nick stood stock still.

"Why—it—it never occurred to me!" he said.

"Well, if you was to ask my advice, I'd say maybe you better think about that side o' it. Tain't every man's got a wife like Gay."

"I'll go you one better there, Uncle Sim," said Nick heartily. "I'm the only man in the world with a wife like Gay. The Lord never made a double. But she needs a change. I've known it for some time. Since Janey Maxwell married and left town Gay's been lonely. I'd hoped our new neighbors would supply the want, but she and Mrs. Halliday don't seem to hit it off very well."

"What ails Mrs. Halliday?" asked Uncle Sim; and Nick laughed at the old man's assumption that the fault couldn't possibly be Gay's.

"Nothing, that I can see. It was she talking with me at the bank when you came in—a pretty little woman in a blue gown. She always wears blue—says it matches her eyes. Pretty eyes, too—trusting, innocent variety. Gay says they're too innocent, but I think she doesn't do the woman justice."

"She got any mister?" asked the old man suddenly.

"Yes—a cynical author about twice her age."

"Maybe those innocent blue eyes is what made him cynical," chuckled Simeon Bartlett. "Seems like I've heard o' such things sometimes havin' effect. Well, here we be. You set that ice cream in the coldest spot you can find, Nick, and I'll see to Sonny. I b'lieve I'm hungry. Didn't have time for no proper breakfast before I started."

During the meal that followed (and despite Uncle Sim's warning, Gay had a batch of the corn muffins she knew he liked), the question of the visit to State Line was broached again.

"You've got to go, dear," said Nick firmly. "It'll do you a world of good, and I'll come for Sundays. It will be a wonderful excuse for me to get away myself."

"Will you come this Sunday?" asked Gay wistfully. She felt suddenly homesick at leaving him at all.

"It's Thursday now, my dear," Nick answered, smiling, "and you can't get off till tomorrow. I'll give you one week of freedom from my company. And you needn't worry about me, Gay. I told Mrs. Halliday I was sending you away, and she suggested my going with them on a trip some Sunday, so I'll be provided for."

"That's very kind of her," said Gay; but her voice was cold, and Nick, rising, went round the table to kiss her cheek.

"If you think," he said, "if you think for one minute that I prefer an auto trip with the Hallidays, to a Sunday at Uncle Sim's with you and the kids, why you haven't the sense I give you credit for. But it was kind of Mrs. Halliday to ask me. You must be fair to her, Gay. She just took pity on me. She says Halliday's like a lost soul when she's away."

"And then," said Uncle Sim, in a tactful effort to clear the atmosphere, "I suppose he sets him down and writes one o' them cynical stories that makes a man want to get out his razor and cut his throat! But Nick's right, dearie, you need a change o' scene; and I need company somethin' terrible. I got a good woman doin' for me now, and you won't have to raise yer hand except to see to the babies; and if I'm not mistaken you'll find me some help there. You can stay as long as you want, and I won't urge you to stay a minute longer. As for Nick—maybe livin' in bachelor's hall for a spell will make him appreciate his blessin'."

Nick laughed.

"You bet it will! But I'll try not to mess things up too much, Gay. Don't let that worry you."

"She ain't goin' to let a darn thing worry her," announced Simeon. "Say, Nick, I'm not goin' to drag them babies forty miles by train in this weather. Is there a man in this pesky town who'll carry us over in an automobile—no tin Lizzie, mind you, but somethin' that's got springs? If so I'll interview him this afternoon."

"Sam Hilton's got a good car. He's a good driver, too. I wouldn't trust my family to everybody's driving over those hills. You make him go slowly, Uncle Sim. He can speed all he wants on his way back. Gee! I wish I were going with you!"

"M-m," muttered Simeon; then glancing at Sonny he said softly: "Look, folks! that baby's asleep over his ice cream!"

It was true. Sonny's head had lolled forward, and his eyes were closed.

"That comes of skipping his morning nap," said Gay. "Poor little man! I'll carry him upstairs."

But Nick was ahead of her, lifting the boy gently.

"Put him in our bed," she whispered. "Baby's still sleeping in the nursery. Well," she added, as Nick left the room, "if Sonny sleeps a while I'll be freer to do my packing. I've a pile of mending a mile high."

"Let it be," said Simeon, "and mend it after you get off. Now if you'll put away the left-over victuals (that's the one thing my old woman never let me do), Nick and me'll wash up these dishes. And then I'll go back down town with him and see about gettin' transportation. Gorry! I feel like I was startin' out for foreign parts, takin' a whole family along like this! Sometimes I wonder what I did do 'fore I had you and Nick to bother with."

Gay smiled. The old man's happiness in the thought of her visit was contagious.

"And I wonder how we'd manage without you to fall back on times like this. I wish we could repay you, Uncle Sim."

"What about all them Christmases and Thanksgivins I've spent with you?" he said gently. "Guess you don't owe me nothin', Gay. Here, Nick, you tackle that dish pan and I'll wipe. If you're late back I'll make it right with the boss. An' don't you get nothin' but crackers an' milk for supper, Gay. Nothin' tastes much better on a hot night, and it'll be good practice for Nick—eatin' light. I don't b'lieve he'll get him no roasts o' beef while you're off visitin'."

"I'll devour the left-overs," Nick answered, as he rolled up his sleeves, "and then patronize the village hash house. But you'll have to kill the fatted calf on Sundays, Uncle Sim. I shall have the appetite of a wolf."

"Now don't you go an' get all het up hurryin'," advised Simeon, as he and Nick were departing for the heat of Main Street. "We don't need to start any special time; and my old woman used to say nothin' tired her out like rushin' round tryin' to get somewhere on schedule. Just you go slow an' easy like, and maybe I'll have a surprise for you come supper time."

"This seems to be a day of surprises," Gay answered. "If any one had told me this morning that before noon I'd be preparing to desert my husband, I wouldn't have believed him. I don't feel quite right about it even now."

Nick smiled—put his hand beneath her chin—lifted her face and kissed her. He stepped outside, then came back to perform the rite again. Simeon beamed upon them.

"That's right," he said. "Better keep goin' while the goin's good!"—and opening his huge umbrella he considerably turned his back.

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

CHOCOLATE BREAD PUDDING

- 1 package chocolate flavored junket.
 - 2 slices whole wheat bread — 1/4 inch thick.
 - Butter.
 - 1 pint milk.
 - Raisins.
- Remove crusts from bread, butter lightly and cut in small cubes. Divide the cubed bread among 4 dessert dishes and add a few seeded raisins. Prepare junket according to directions on package. Pour at once over bread. Let stand in warm room until firm—about 10 minutes. Then chill.

CINNAMON APPLES

- 1 junket tablet.
- 6 medium sized apples.
- 1 cup sugar.
- 1/2 teaspoon vanilla.
- 1 pint milk.
- 3 tablespoons red cinnamon candies.
- 1 tablespoon lemon juice.

Peel and core apples and place in baking pan. Make a syrup by boiling the sugar (except 3 tablespoons which is used for the junket), water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, filling the center of each apple with syrup. When cooled, and the syrup has jellied, prepare junket according to directions on package and fill dishes. Let stand in a warm room until firm. Then chill.

Central Electric Station Industry

Generation Of Electrical Energy For Public Use

Canada's central electric station industry—the generation or distribution of electrical energy for public use—has attained record proportions because the wide distribution and accessibility of her abundant water powers is such that, with modern means of transmission, low cost hydro-electricity for industrial, agricultural, and domestic use is available to all but a small proportion of her population. In sections remote from water-power, abundant supplies of native fuels constitute potential sources of electricity.

Manitoba Silica

Deposits of silica sand, possibly suitable for glass manufacture, are found on the shores of Lake Winnipeg, Manitoba, as well as at Beauséjour, about 25 miles south of the lake.

Minard's Liniment for Frost Bite.

Electric Ear Detects Noise

Invention Will Be Invaluable In Locating Trouble On Machinery

An electric ear with which engineers hope to reduce noise by setting one sound to kill another sound has been demonstrated publicly for the first time at Pittsburgh.

This method of noise abatement consists merely in causing two sound waves to interfere. A big obstacle has been the human ear's inability to separate complex noises sufficiently for engineers to find out which one to set against the other.

The electric ear, it was announced, promises to overcome this handicap. Weighing 60 pounds, the size of a suitcase, its method of attaching to and "listening" to a noisy machine was demonstrated at the Westinghouse research laboratories by J. P. Foltz, Westinghouse inventor.

"In a somewhat different application it is also hoped that in the future this new portable ear may be used as an advanced fault-finder for airplane motors and propellers," said Foltz.

Remarkable Stars

Continuously Shooting Off Matter In All Directions Into Space

The most puzzling case of stars in the sky is that known as the Wolf-Rayet, so named because their peculiar character was discovered by the astronomers Wolf and Rayet at the Paris observatory in 1867. Observations carried out over a number of years by the Dominion Astrophysical Observatory, Victoria, B.C., have in part elucidated the mystery. These stars are continuously and violently shooting off matter in all directions into space. There is a constant stream of atoms travelling outward from the stars like a tremendous volcanic eruption over every part of the surface, some of the atoms reaching the terrific speed of 1,000 miles a second.

Preference For Dominions

British Government Gives a Preference To Tenders From Empire

It is the practice of British government departments, in the case of contracts, to give a preference to tenders from the dominions and colonies, as compared with tenders from foreign countries, but only within reasonable limits. This was the reply of the financial secretary to the treasury, F. W. Pethwick-Lawrence, to a questioner in the British House of Commons, who asked whether any preference was exercised in favor of supplies from the Empire and Overseas possessions, even where such supplies were not the cheapest available.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Freezing Fails To Kill

Fish and many insects can be frozen without destroying life. Caterpillars, according to entomologists, regularly live after being frozen during the winter. One investigator froze the grubs of the species known as daddy-long-legs, until they would readily break, and those not broken survived. Fish have been frozen in solid ice without killing them.

Minard's Liniment aids Sore Feet.

Prize For Barley and Wheat

At the recent Royal Winter Fair at Toronto, W. Nesbitt, of Superb, Saskatchewan, won first prize with hansom barley Registered and second prize with Marquis Wheat Registered.

There Should Be No Ugly Women!

There are 2 classes of women.

(1) The beautiful, healthy and attractive creatures.

(2) Those pitiful ones who don't know how to make themselves beautiful—rather those who don't know the vital importance of Kruschen Salts to physical perfection and attraction!

Kruschen Salts are a perfect blend of the six vital minerals which Nature ordained, glands, blood, nerves and body organs should daily receive from food if they're to function correctly—and which are impossible to obtain in this age of modern cooking.

Get a bottle of Kruschen—and before the bottle is half empty your complexion should be gloriously smooth and clear. Kruschen clears blood of harmful acids and poisonous waste matter which cause blemishes, blackheads and pimples. Your wonderful new energy will surprise you—mind feels so keen and alert—no more washed-out feeling getting up in the mornings.

Little Helps For This Week

"Walk worthy of God, who hath called you unto His kingdom and glory."—1 Thessalonians ii. 12.

Let me not deem that I was made in vain, Or that my being was an accident. Whirl Fate, in working its sublime intent, Not wished to be, to hinder would not deign. Each drop uncounted in a storm of rain Hath its own mission, and is duly sent To its own leaf or blade.

Even from a corner it is possible to spring up into heaven. Rise, therefore, and form thyself into a fashion worthy of God; thou canst not do this, however, with gold and silver. An image like to God cannot be formed out of such materials as these.—Seneca.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Propose Goodwill Flight

Capt. Boyd, Trans-Atlantic Flyer, May Make Flight To South America

The Canadian Government is considering a proposal to send Captain J. Erroll Boyd, Toronto trans-Atlantic aviator, on a goodwill flight to South America next spring, according to a news story appearing in the Montreal Gazette. The flight will coincide with the British Empire trade fair to be opened in Buenos Aires by the Prince of Wales, March 14.

The Gazette states further: "Although no definite decision was taken, it was explained that financial backing for the mission may be forthcoming. The many advantages of such a flight were detailed to the cabinet by Senator Skintizer who has been working in close connection with the Canadian Chamber of Commerce and Canadian Manufacturers Association in attracting public attention to this notable exhibition."

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

First Coal Mine In Alberta

Coal was first discovered in Alberta by Nicholas Sheran, who opened a mine in 1872 on the west bank of the Old Man River. He broke his own trails, found his own markets, and hauled coal by ox-team to Fort Benton, Montana, and other distant points. A cairn has been erected in Lethbridge, Alberta, by the National Parks of Canada Branch, Department of the Interior, to commemorate these events.

Suffered From Heart Trouble Became Weak and Run Down

Mrs. Wm. Dlotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

COMMUNICATION

To the Editor,
Carbon Chronicle.
Dear Sir:

In a recent issue of your paper
a communication appeared over the
name "Modern Fables." I knew at the
time, as most people in Carbon did,
that it referred to a farewell party for
Mrs. Peters at the home of Mrs. Moor-
house, but I did not in any way con-
nect the article with myself, as I was
not a guest at the party.

Two days before Christmas I recei-
ved through the mail among my greet-
ing cards a clipping of the communi-
cation on which was printed in pencil
"this means you." I was dumbfounded
as I knew I had said nothing about
the party or the guests and only one
lady had mentioned the party to me
and that was over the phone (advertis-
ed as the silent partner.) I immedi-
ately phoned Mrs. Moorhouse who ad-
mitted listening to the conversation
and also admitted that I had said no-
thing about her party or any of her
guests. At the same time she asked
me to come to her house and talk it
over.

At her house she told me she had
repeated the conversation at a mis-
sionary meeting at which a number of
persons were present and has since
admitted that she told several people
that the communication in the paper
referred to the conversation over the
phone. Your correspondent who was
one of the persons present at the mis-
sionary meeting evidently took ad-
vantage of your columns to publish
under an assumed name libelous state-
ments which the other persons at the
meeting would know referred to me
and which have been indirectly broad-
casted to refer to me.

I am very sorry to have to mention
the name of Mrs. Moorhouse in this
letter but it has been absolutely neces-
sary in order to properly place the
facts before your readers so that they
may be able to judge for themselves
whether the name "Kitty Cat" should
be applied to me or to your corres-
pondent.

Your correspondent did not stop to
consider how her communication would
involve Mrs. Moorhouse, her hostess at
the party referred to, but in her an-
xiety to vent some private spite gross-
ly misrepresented the telephone con-
versation and published the article
contrary to the wishes of her hostess.

As far as the conversation is con-
cerned nothing was said detrimental
to the hostess or any of her guests
and your correspondent well knows
that anything that I have to say to
anyone or about anyone I will say to
that person's face as I have already
done and not hide behind any assumed
or fictitious names.

Thanking you for your valuable
space, I am

Yours sincerely,
MARY P. GREENAN
